

SCROLL BAR FABRIC PROTECTORS

JUNE A. ABEL, 383 PROSPECT RD., BEREA, OHIO 44017

CLAIMS

01 What I claim as my invention is a needlework accessory consisting of fabric with magnets sewn into the ends of the needlework accessory which then wraps and is held securely by the magnets over the ends of non-working needlework fabric that has been mounted on a scroll bar.

02 The needlework accessory as defined in claim 01 wherein the magnets used are round in nature includes magnetic strips, donut magnets, square magnets, triangle magnets, magnets coated or painted, heavy duty, lightweight, large, medium, small, craft magnets and magnets with a varying gauss (a measure of magnetic strength) can be used to produce the needlework accessory.

03 The needlework accessory as defined in claim 02 wherein a metallic (containing iron) including washers, discs, slugs, or strips as one of the opposing magnets will produce the same results of securing the fabric ends together of the needlework accessory.

04 The needlework accessory as defined in claim 01 wherein fabric used includes, vinyl, suede, plastics, polyesters, cotton and other non cotton fabrics to produce the needlework accessory.

05 The needlework accessory as defined in claim 01 will vary in size (length, width and diameter) due to size and type of magnets used and various sizes of scroll bars used by needleworkers.
